Thanks for the opportunity to review this.

Here's my honest review:

This guide is extremely impressive. A++

It is written well and has no spelling or grammar errors.

It definitely contains that knowledge that you need to bypass KYC.

I learned so much from the guide I would say it is worth the money OP is charging.

Thanks again!

Not wise to add your personal contact information on a public forum.

I can't even PM someone even after getting to 30+ posts.
Convo is not available either.
But I can understand you. Thanks for pointing this out.

That's a good question. Just become more active, create more threads and posts, and you will have access to PMs and ChatConvo. I'm not one to tell users what they should do, as I'm not Staff.. but you'll get a warning when Staff see's you post personal contact information on the forum as a regular member.

All those posts that you see that have that red and black box on them, edited by Staff.. that's a user who has been warned for doing something similar.

How about this, I'll help you.. delete your number from the post, and I'll upgrade your account free of charge, and you can then Private Message the person yourself.

Review of KYC Guide:

I was fortunate enough to receive a copy of the KYC Guide written by Sealoung, and have promised to leave a review in return for his generosity. I want to start off by saying, the OP knows what he's doing when it comes to this subject. Reading thru the guide, you can instantly tell that the OP has previous experience with the information that he's presenting in the guide.. and this isn't something that he just threw together as quick way to make a dollar. While the guide contains a lot of information, I did feel like there was some additional information that could have been included, that was not included. But there is a reason why the OP has left this information out, and it's not because he was too lazy to include the information.. it's because it would make the guide too blackhat, and it wouldn't be able to be sold on the forum.

With that being said, the OP promises to offer free updates to anyone who purchases the guide, along with that he will answer any questions that you may have along the way with using the guide.. which in itself, is invaluable.. because as I said, he knows his stuff. If this is a niche that you're looking to dive deeper into, then the OP is the person you want to learn from. He provides information on how you can use the information in the guide, to then turn around and earn money from it, along with what things you should do to avoid running into any issues along your way.

In my opinion, purchasing the Guide + having the OP as someone that you can reach out to for assistance for getting the balling rolling with everything, I feel like it's worth the \$60 price tag. As long as the OP is willing to provide guidance along the way, then you will have everything you need to get started in that niche, and there is definitely money to be made within the niche, I know this

from my own experience. You just have to be willing to put in the work to get the money.
