Thread: [Developer for an iOS app - Cryptocurrency wallet](#)

Interconnector - August 20, 2025, 3:11 pm

I need a simple wallet made for iOS, and I'm negotiable about the price.

It only has to contain simple features, capability to transfer and receive via API, create wallet, etc.

All I need is the source code, and the UI made along with other project files to build it myself and update.

Start offer: \$1000

I can handle this for you within your budget. Let's have a convo

Darth_Vadar - August 20, 2025, 7:47 pm

I can develop a secure wallet with a better design than most wallets with biometrics and 2FA support.

Minerva1 - August 25, 2025, 6:40 am

Looks interesting

systemgamer - August 26, 2025, 10:49 am

I just messaged you.
