Easy steps on how to get a free (temporary) virtual number!

? Requirements: IOS/Android Device ?

- 1) Create a new apple id (not required) - Make sure there isn't any card attached
 - 2) Download Hushed - 2nd phone number on your phone IOS /Android
 - 3) Create a new Hushed account - you can use burner emails like tempmail.com, 20minutemail, etc..
 - 4) Select the Free 3 day Trial
 - 5) Choose your number
 - 6) Cancel subscription after verifying or just keep the trial there isn't any card attached
 - 7) After your trial, delete the app and follow steps 2 to 6 again to generate a new phone number
- ???Try not to do this too much on one apple id /google play store account. It might get patched ???
