Currently farming \$GAMBLE on Toshibet which is a newer no kyc casino. Who knows how the coin will perform.. but the casino is pretty good. True no kyc and insta deposit/withdraw.

I think I had maybe 1 airdrop that made me money. Most were complete garbage. I don't really participate in them anymore.

Whenever new crypto launches they distribute coins to users based on some activities like sharing to friends, joining others to the system. Like ipo in stocks. We get free coins based on activities. We can sold them later in markets when listed in exchanges
