Thread: [fLaSh Mailer Tool - AIO Email Checker](#)

fLaSh_1337 - August 23, 2025, 3:34 am

High performance SMTP, IMAP and POP3 checker, bulk inbox search and email sender, email view, designed to work with millions of lines very quickly.

Features Full support for SMTP, POP and IMAP with the latest protocol specifications

The fastest Email Checker I've ever tested

Automatically detecting connection encryption type, SSL, StartTLS, etc

Internal Database for fast Checker mailer host and automatically adds hosts discovered by vectors to database

Internal Database for Checkeds, with the possibility of searching, grouping by protocol and export data to .txt, .csv or html

SMTP Email Sender to distribution list, with Bcc option

SMTP Email Sender supports Body in Plaintext or HTML, and attachments, and Custom 'From Name' and 'From Address'

IMAP/POP Bulk Email Search up to 500x threads

IMAP/POP Email View (with search, pages steps, deleting, etc)

Database in SQLite, with millions servers records

Custom vectors, hosts/ports for scan the mailer host

Proxies support HTTP, Socks 4/5, Proxy Rotation and API URL

Smart Multi-Thread: If the CPU is under heavy use, the threads are decreased, and they are increased in little use

Faster Proxies Checker tool

Support checks direct from file without load to GUI for large files (tested with 30 Gb email:pass)

Multi-thread; up to 1000 threads

Tools, IP to Country, DNS Query, Pinger, SSL Certificate Checker, Email Checker and Email Server Finder

Languages available in English and Russian

App themed, Dark, Light or .NET Native

User-friendly interface

Standalone App don't require an installation

Dependencies MS .NET Framework 4.8

MS VC++ 2015-2022 x64

Requirements 64 Bits OS

Windows 10 or higher

Windows Server with support for .net 4.8 and VC++ 2015-2022 x64

Price 150 USD

License Lifetime, does not expire or require monthly fees

Free updates for one year, after expire, 50% the price (50 USD) to renew updates for more one year

Recommendations Use the Dark theme (for better visualization, it has been greatly optimized)

Use Windows 11 or the last Win Server

If the proxies are not good, increase the retry limit

Check if AV's is blocking mailing traffic

NOTE: this tool not checks Web Mail (like hotmail)

Do u provide vouch copy to test your full product in action for x period of time so forum people can see how it actually works ?

fLaSh_1337 - January 28, 2026, 12:59 pm

I'll remain the price as listed in first post for an indefinite period.

Take advantage of this price, it's only available on HF.

This may change in the future..
