Thread: [Some issues with my spread methods.](#)

podrera - August 23, 2025, 4:25 pm

I used to be very successful with my spread methods, mainly involving torrents and fake job ads where I lured people to download a "resume sender" software. But I'm unable to repeat this feat for obvious reasons: I can't upload torrents to any major torrent websites, and the other spread method I was using with job ads, I can no longer perform due to massive restrictions involving both phone verification and mods aware of the previous damage I did. I'm talking about Craigslist. What else can I do? I feel trapped. I'm not begging for guidance, just some direction for a new approach. Any help is greatly appreciated.

Sent you a dm my friend.

servanttheater - August 23, 2025, 4:46 pm

Have you found any help yet?

Like psychiatric help? ?

systemgamer - August 26, 2025, 6:19 pm

It's time to start finding zero-days

warmturj - September 7, 2025, 3:28 am

Anyone here want to help me with my private method dm me tg

Security professionals find zero days regularly.

Skids... not so much. ?

I am also finding a good way for spreading my rat virus. I am currently using clickfix method and embed spread code into high traffic domains. But this method is too random and I want to focus on specific countries such as US or UK.

Any good ideas? I am willing to pay for my cooperators.

Please PM me here or via telegram. @nyx_shadowbyte
