Ether gains 10% after Fed's Jackson Hole, ETF holdings top 6.4M ETH

Record ETF inflows pushed Ether holdings to 6.4 million, tightening supply as the price tested \$4,668 after dovish comments from the Federal Reserve Chair Jerome Powell.

That's a fascinating look at the market.

It's always interesting to see how traditional finance news, like what the Fed is doing, can have such a big impact on crypto prices.
