Looks very interesting, may I ask where the company/hosting is actually based? Is it similar to

mullvad where you don't log anything at all or do you log for instance when someone connects to a server and what their IP was or however most of them do it? Thanks!

Thanks for your interest!

Of course, you can ask.

We do not collect or store any activity logs. This means: No browsing history

No traffic destinations

No data content

No DNS queries

We also never keep connection logs. That includes: No records of your IP address

No assigned VPN IP address

No connection timestamps

No session duration

Your privacy is fully protected—nothing is tracked, nothing is logged. Feel free to reach out if you have any other questions.

Excellent features

How many countries does it support?

SkyRocket78 - August 30, 2025, 12:03 pm

Does this VPN offer dedicated ips? I am looking for a VPN like this that offers a dedicated IP even at a small extra cost

We currently do not offer dedicated IP's, we will consider adding it if there will be a demand from customers. Thanks for the suggestion!

what about ports?

i mean, do you provide port forwarding option?

Currently, we can open ports by request.

We're working on a feature to allow users to open ports via the dashboard.

You can do whatever you want while using the VPN. The Terms of Service are there because it's mandatory.

Does it have a server in Switzerland? Can I use it to watch Swiss television (because it's not available outside of Switzerland)? Thanks.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for

each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
