HKGAI And FLock.io Partner To Advance Decentralised AI For Government Efficiency

Hong Kong Generative AI Research and Development Centre (HKGAI) has officially announced a strategic partnership with FLock.io. The partnership will deliver secure, transparent, and highly efficient AI solutions tailored explicitly for governmental applications.

Using decentralized AI for government stuff sounds like a big step. It's a cool idea, trying to get efficiency and privacy at the same time. Honestly, you have to wonder if it will actually work in the real world, but it's a bold move.
