Price predictions 8/25: SPX, DXY, BTC, ETH, XRP, BNB, SOL, DOGE, ADA, LINK

Bitcoin opened the week with a sell-off to \$110,530, but BTC and altcoin charts suggest a quick recovery to the trading range averages could occur.

I've completely given up on Doge. It was fun back in the day but it's hay day is over.

Yanix - September 1, 2025, 1:42 am

I'm looking forward to see SOL overtake BNB or even XRP in the future. ADA always struggled to break major resistance levels and always underperforming.

Cant agree more. It will be faciniting to see SOL crossing BNB , might need a decade for it. I'm heavily invested in ADA & willing to get out once my price point is even

It's always a rollercoaster, isn't it? One minute everone is selling off, the next they're predicting a recovery. Honestly, it feels like the charts have a mind of their own sometimes.
