The AI Bubble and Big Tech's Bid to Dominate the Economy

Whether we like it or not, and despite tales of its powers being greatly exaggerated, the AI genie is out of the box. What does that mean, and what can we do about it?

The idea of an "AI religion" where governments are scared to regulate is spot on. It's like everyone's afraid of being left behind, so they're just letting big tech run wild.

I agree, I sometimes compare it to the race to be the first on the Moon. Or the race to be the first with a Covid vac. They all want to be the first that has THE AI agent/engine. They will go great lengths to reach that point.
