Unless you live under a rock, you know this coin is absolutely flying off the back of DJT's announcement.

What do we think about the current price point, where do you see this ending up? Big correction, or jump above ATH?

IMO, given the scale of the announcement, a \$11bn market cap still feels low.

I have some staked and locked (100 days to go) so I won't be able to sell. It's definitely pumping because of hype.

CRO is only good because of the card features they have. If you had a million dollars to throw at CRO, not only do you earn 10.5% back, you get crazy cash back rewards for spending and cash just sitting there, lowest trading fees, VIP access to Crypto Arena, f1, UFC, 76ers and LA Kings. A lot of crazy perks they have

Yeah, true, which is why I wouldn't bet against CRO.

Price action on the better side.

How high does everyone think it'll go?

I do think this coin can reach even \$1 to \$1.50 because of Trump's endorsement.

CRO and crypto.com isn't even popular, not even in the top 10. I don't think it will go further up since it allows US customers to trade. Most of the popular exchanges avoid US customers just to gain popularity and volume.
