Thanks!

As a reminder, we can ignore SpamHaus, including SBL, for an additional fee.

Also, on dedicated servers we can rent you a /24 from Iran fully bulletproof :)

0xHost - September 17, 2025, 7:26 am

Hello,

We have several Dedicated Servers available:

- 2x Intel Xeon E5-2699v4 / 512GB RAM / 2x4TB NVMe
- 2x Intel Xeon E5-2699v4 / 512GB RAM / 2x4TB NVMe / 2x 250GB SSD
- 2x Intel Xeon E5-2699v4 / 512GB RAM / 1x4TB NVMe
- 2x Intel Xeon E5-2699v4 / 256GB RAM / 1x2TB NVMe

All with Anti-DDoS protection included, Bulletproof IPv4 (Iran), perfect for any activity! ;)

0xHost - September 23, 2025, 9:31 am

Hello,

We have updated the CentOS 7 and CentOS 8 mirror to our own!

0xHost - September 26, 2025, 1:52 am

Hello,

We also offer the following products:

- GRE Tunnel
- Anonymous ASN (we handle company creation and ASN registration)
- /24 Bulletproof
- Bulletproof IP Transit

0xHost - September 29, 2025, 7:53 am

Hello,

We have added new domain extensions! .vc, .cx, .at, .cc, .app, .hk...

0xHost - October 1, 2025, 3:21 pm

Hello,

VNC is now available in all VPS plans!

juulstar - October 2, 2025, 8:33 pm

I'm not Uber, but I'm an old, trusted member and am looking for an offshore host currently. I already referred a buddy to you due to you having Windows as an option. If you want a vouch, lmk. Otherwise, I have these questions:

Can you scale your existing VPS (i.e. upgrade it or downgrade it to a different plan with more or less resources)?

Is mailing (legally) allowed?

christianjohn - October 2, 2025, 9:26 pm

price how do i contact privately ?

juulstar - October 3, 2025, 4:01 pm

Please see my PM.

0xHost - October 4, 2025, 5:20 am

Hello,

We are pleased to announce a new feature! You can now view abuse reports you receive directly within VPS management.

(Oct 2, 2025 09:26 PM)christianjohn Wrote: [\[CITE\]](#) price how do i contact privately ?

Hello,

You can find the prices in our thread. You can also sign up on our platform and check prices there.

You can contact us on Telegram: @HostAgent_Bot

Yes

0xHost - October 13, 2025, 6:33 am

Hello,

We have added a new node for VPS servers. Soon Storage VPS!

doms5 - October 27, 2025, 3:10 pm

Hi, what about the domain, if hosting some cracked stuff ? if you got abuse you stop it ?

0xHost - October 28, 2025, 8:03 am

(Oct 27, 2025 03:10 PM)doms5 Wrote: [\[CITE\]](#) Hi, what about the domain, if hosting some cracked stuff ? if you got abuse you stop it ?

Hi,

We ignore abuse reports on domains, but as is known, bulletproof domains are something that doesn't exist as ICANN will shut down the domain sooner or later.

0xHost - October 30, 2025, 3:59 am

Hello,

You can now check our available dedicated servers in our client area.

Sticky Bot - November 11, 2025, 6:00 am

chefsauce1231 - November 13, 2025, 4:15 pm

port 25 465 587 open and email spamming allowed i wont use your ip i am using hacked corp emails i just use vps for using nodemailer

1543135912 - November 14, 2025, 5:59 am

Currently, your website allows all potential customers to check the pricing information only after logging in. It is not convenient. I suggest that you can make all pricing information available before customers register or log in.

By the way, does your Bulletproof VPS allow port scanning and brute force ?

0xHost - November 15, 2025, 2:54 am

(Nov 13, 2025 05:15 PM)chefsauce1231 Wrote: [\[CITE\]](#) port 25 465 587 open and email spamming allowed i wont use your ip i am using hacked corp emails i just use vps for using nodemailer
Hello,

You can, but avoid sending or using corporate emails from Iran or Slovenia.

(Nov 14, 2025 06:59 AM)1543135912 Wrote: [\[CITE\]](#) Currently, your website allows all potential customers to check the pricing information only after logging in. It is not convenient. I suggest that you can make all pricing information available before customers register or log in.

Hello,

You can check prices in the thread too. You can perform port scanning and brute-force activities, just avoid Iran ranges and Slovenia ranges.

hashe - November 20, 2025, 11:37 am

vouch for 0xHost fast deploy after purchase and the speed is good

SIM-2921535 - November 24, 2025, 9:57 pm

Hello

I can use VPS for spamming and Bruteforce and also port25 open ?

0xHost - November 27, 2025, 2:07 am

(Nov 24, 2025 10:57 PM)SIM-2921535 Wrote: [\[CITE\]](#) Hello

0xHost - December 23, 2025, 5:00 am

New Node Deployment, Storage VPS & Network Expansion

We are pleased to announce the deployment of a new high-performance node powered by AMD EPYC 7763 with 512 GB RAM. This upgrade further expands our compute capacity and ensures additional headroom for existing and new customers.

Our current node lineup is as follows:

- Node-01: AMD EPYC 7763 / 512 GB RAM
- Node-02: AMD EPYC 7763 / 512 GB RAM
- Node-04: Dual Xeon 2699v4 / 512 GB RAM
- Node-08: Dual Xeon 2699v4 / 512 GB RAM
- Node-10: Storage – AMD Ryzen 5 3600X / 60 TB HDD
- Node-11: AMD EPYC 7763 / 512 GB RAM

Alongside this, we are introducing a new category: Storage VPS servers. These plans are currently undergoing final implementation in our management panel, and a group of users is already testing the service. Once this phase is complete, Storage VPS plans will be made available to all customers.

To meet the growing demand for dedicated servers, we will also be deploying a new blade center. Our last dedicated stock sold out quickly, and this expansion will allow us to offer additional bare-metal servers in the near future.

Finally, we have acquired a new /24 IPv4 range. With this addition, we now operate three separate IP ranges suitable for offshore and bulletproof use cases, providing greater flexibility and scalability for our clients.

We remain committed to continuously improving our infrastructure and services to better serve your needs.

PS: New thread design! :)

0xHost - December 26, 2025, 2:22 am

We have some dedicated servers in stock:

- 2x Intel Xeon E5-2699v4 | 512GB RAM | 2x 4TB NVMe + 2x 250GB SSD
- 2x Intel Xeon E5-2699v4 | 256GB RAM | 1x 2TB NVMe

We can also provide a /24 IPv4 allocation if needed, ideal for those looking to start their own hosting services or for other related projects.

0xHost - April 12, 2026, 4:13 pm

Web hosting is now live

We are happy to announce that Web Hosting is ready and available to order.

--

We've added Windows Server 2012 R2 to our available operating systems!

0xHost - April 15, 2026, 6:19 am

One of our most requested servers is available again, featuring 2x Intel Xeon E5-2697v4, 128GB RAM, and 1x 2TB SSD.

We know many of you have been asking for a server with 128GB of RAM, and we're happy to have this configuration back in stock.

Grab it while it's available!

bukkylove2k2 - April 28, 2026, 11:27 pm

Do you support RDns?

0xHost - June 1, 2026, 4:12 pm

We would like to inform you that 0xhost.com has been our main domain for some time now, and a redirect from 0xhost.net has already been in place over the past days.

As part of this transition, 0xhost.net will be fully phased out and will become inactive soon. We strongly recommend updating any saved links, bookmarks, or integrations to use 0xhost.com directly.

All services, including the client area, API, and documentation, are fully accessible via the new domain.

If you experience any issues or have questions, feel free to contact our support team.

--

We currently have a single unit available with the following configuration:

AMD Ryzen 9950X
64 GB RAM
1× 2 TB SSD

Price: 425 EUR/month

This is a one-time availability and will be allocated on a first-come, first-served basis.

If you are interested in deploying this server, please contact us to proceed with the order.

Sticky Bot - June 22, 2026, 2:00 pm

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not

get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on Jul 20, 2026. OxHost - August 11, 2026, 7:11 am

OxHost is now reachable over Tor (official v3 onion mirror)

We have set up an official Tor onion service for OxHost, covering both the main site and the client area.

Address:

Code oxhosti5xzgo7uwhhghoo7wh7zch6z74aacpu22ivuv3uyy6gpidfhyd.onion

The same site and the same panel, not a stripped-down version. You can sign in, order, pay and manage your services exactly as you would on the clearnet. Traffic stays inside the Tor network end to end, so there is no exit node involved.

We have also set the Onion-Location header on the clearnet site, so Tor Browser will show the ".onion available" button when you visit Oxhost.com.

XtremeDiscount - September 12, 2026, 1:02 pm

I make lots of websites so I may look into this. Thanks OP

OxHost - September 14, 2026, 3:21 am

Hello,

You can now manage your entire OxHost account from Telegram with our new bot, @HostAgent_Bot.

From the bot you can order and manage your VPS and dedicated servers (power on and off, restart, reinstall, reset the root password, open a VNC console, and toggle auto-renew), pay your invoices with crypto or your account balance, open and reply to support tickets, and talk to a real agent in real time. It uses the same catalog and the same pricing as the website.

To get started, open @HostAgent_Bot in Telegram and press Start. If you already have an account, you can link it in seconds from your profile under Connect Telegram.

Sticky Bot - September 20, 2026, 6:00 pm

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. Transporter007 - September 21, 2026, 11:55 am

Website is down

OxHost - September 27, 2026, 12:07 pm

We have rebuilt the whole OxHost client area. Your account, services and links stay the same.

- New panel: cleaner design, dark and light mode, works well on phones. Available in English, Spanish, French, Turkish and Romanian.
- Firewall and anti-DDoS control: every VPS and dedicated server has a Firewall tab. See the attack

history per IP, write your own rules, build IP lists and apply ready-made profiles (game servers, WireGuard, OpenVPN, TeamSpeak and more).

- Extra IPs and extra disk at checkout: add IPv4 addresses and an extra SSD disk (10 to 100 GB, €0.25/GB a month) while ordering your VPS. You can also add the disk later, with the server running or powered off.
- Choose your primary IP from the addresses on your server.
- Also new: sign in with Telegram, anonymous account generation, never-expiring API keys with new API docs, live chat inside the panel, a public status page and a changelog.

Prefer the old look? Switch to the classic design from your account menu at any time.

0xHost - *October 2, 2026, 1:59 am*

You can now set the reverse DNS (PTR) of your IP addresses yourself!

Where to find it

- VPS: open your server and go to the Network tab.
- Dedicated server: it is on the Overview of your server.

What you get

- Instant: changes are live on our nameservers right away. Other resolvers may take up to an hour to pick them up.
- Every IP: primary IPs, extra IPs and IP add-ons, on VPS and dedicated servers.
- API: also available through the API with `/API/rdns/list` and `/API/rdns/set`. See the API documentation.
