Thread: [New Sales Tags](#)

Omniscient - August 30, 2025, 8:26 am

[Motusora](#) is working on some new Sales Tags.

Can I get some feedback on these?

I like them, how about just the tiniest bit of animation?

Love the colors, and the idea of adding additional new Sales Tags period. Looking forward to seeing which others will be added.

Love the colors, I do agree that a simple shine animation might take them to the next level.

Designer gonna look at doing some light animation on them.

They look good! Some animation will make them top notch!

Looks nice , it requires a fee to be added right ?

What do you think of these?

Pimping - August 30, 2025, 6:00 pm

I was actually going to make a thread asking when sales tag designs might be updated since some of the current ones look too old or its not as eye catching. I think these ones are good and like others said if they were animated it would look even better

maybe have different colors too so people can choose instead of just the blue

Large scaled images and the wrong size.

What looks great at 300x300px might not look so great at 100x24px (actual size of Sales Tags).

Love the new sales tags! Nothing too complex for the eye. Would be cool if sellers could create their own sales tag for their sales thread one day :)

I think the resized display doesn't look very good.

Yeah I know. Actually generated those with AI. Think they're actually pretty sick and if some designer could adjust the size and all that, I'd definitely be interested.

Not sure if this has been finalized but I liked the fact that different tags were different colors. Having them all as same color feels like they won't stand out as much.

Waiting on [Motusora](#) to give me finished set.
