Sent you a message on telegram. Looking to have a consult on a proof of concept for something in the making.

Latest builds:

OVERVIEW

Allia is a 24/7 AI voice receptionist for dental clinics. It answers every incoming call, books and reschedules appointments, answers common questions (hours, location, pricing, insurance, emergency policy), separates urgent from routine calls, and transfers to a human when needed. It is built to integrate with the calendar tools a clinic already uses, rather than locking the clinic into a single closed platform.

My apologies. We're the contracted sole development team for the game, an official banner confirming this will be live on <https://crystal-war.com/> shortly.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
