BumpX Telegram Shouter & Forwarder Bot
Shout / Forwarder Telegram Bot — Auto-post to Groups & Channels
by [Xferno](#)

Schedule a message once and let the bot shout or forward it to your target group/channel on autopilot — every X minutes, for as long as your plan lasts.

HighlightsInterval posting: every 1/2/5/10/15/30+ minutes (change anytime)

Duration per campaign: no-expiry or 3 / 7 / 15 / 30 days

Private setup: set or edit your ad in DM; the bot posts to the configured group/channel

Manage easily: list campaigns, pause/resume, change interval, delete

Admin & Mod roles: admin-only menu; mods can manage campaigns (except adding new mods)

Customization & ExtrasAny customization possible — branding, intervals, UI tweaks, roles/permissions, logs, and more

Live demo available — DM for access and a walkthrough

Live Demo & ScreenshotsLive Demo: DM [@xferno](#) for instant access

Screenshots:

How it worksDM the bot and tap Pick Destination

Set Interval and Duration

Provide the message to shout

Tap Schedule — the bot posts automatically until paused or expired

PaymentsIntegration not yet enabled — will be implemented per client preference (e.g., Crypto, Stripe, PayPal, etc.)

ContactTelegram: [@xferno](#) — ask for the live demo

Discord: @Xf3rn0
