All-in-One Telegram Casino Bot (Dice • Blackjack • Roulette)

Dice • Blackjack • Roulette

by [Xferno](#)

Launch your own mini-casino inside Telegram. Players get a clean UI, instant results, and a verifiable “provably fair” system. You get full control with an admin panel, credits, and redeem codes.

What players get Games: ? Dice (pick 1–6), ? Blackjack (3:2 on natural), ? European Roulette

Provably fair: server seed hash, client seed, nonce; seed is revealed on rotation so every past bet can be verified

Simple commands: /start, /balance, /dice <amount> <1-6>, /blackjack, /roulette, /redeem CODE, /fair

Fast UX: inline buttons, clear win/loss messages, live balance updates

What you control Admin panel: credit/debit/set balance, view ledger history

Promo system: create redeem codes (amount, max uses, expiry, notes)

Limits: min/max bet, payouts, and general risk controls

Branding/pricing: currency label, copy, and visuals customizable

How it works Player runs /start and receives the menu

They choose a game and place a bet

Result + balance update are instant; each bet stores the seed hash, client seed, and nonce for verification

Fairness details Before play: server publishes server_seed_hash

Each bet: uses server_seed + client_seed + nonce to derive outcome

On rotation: server reveals server_seed; players can recompute and verify all past bets match the original hash

Players can use /fair to see their current seeds and verification tips

Payments (ready to integrate) Crypto checkout (on-chain or gateway) -> webhook -> auto-credit

Telegram Payments or Telegram Stars for in-chat purchases

Manual top-ups and promo codes supported

Tech & hosting Built for self-host + PM2; balances stored server-side

Lightweight APIs for payments and admin actions

Structured logs & audit-friendly ledger

Customization & compliance Any customization possible — UI text, branding, limits, RTP/house edges, KYC hooks, region rules, logs/reporting

Optional geofencing, age-gate prompts, and rate limits

Please comply with your local laws and platform rules (18+)
