Hey everyone,

Recently found this game - https://store.steampowered.com/app/2732820/The_Great_Rebellion/

Has anyone played this? Looks fun, and I'm thinking of picking it up for 10 bucks.

I ended up picking up the game. The game is a retro cyberpunk-style shooter. Worth every dollar. It seems the studio behind it plans on releasing the next version soon. I'd give it a solid recommendation.

Glad you ended up enjoying! I see that while it only has a little over 500 reviews, they're overwhelmingly positive. It does look like a fun little game and that is somewhat up my alley for when I'm in the mood for something like that. Also, to anyone that is interested, it looks like it's 60% off right now and so only \$6.39 rather than \$15.99. All the more reason to pick it up if it looks good to you or even if you're just on the fence.
