Thread: [\[SELLING\] Access to Compromised FTP Servers \(vsFTPd 2.3.4 Backdoor\) 12 Boxes in](#)

ulyanovsk07 - September 2, 2025, 6:49 am

? About the Offer:

I'm putting up for sale 12 compromised Linux boxes (root shell access via vsFTPd 2.3.4 backdoor).
These servers are located in:

?? United States (2)

?? China (3)

?? Singapore (2)

?? Malaysia (2)

?? Germany (3)

Access is persistent, reliable, and verified.

? Why am I selling?

Some of these boxes have served me well for:

Payload hosting (including ransomware staging)

C2 traffic redirection

Proxy chaining / traffic anonymization

But I'm rotating infrastructure and scaling down. So I'm offloading a few to interested buyers.

? Proof of Access:

? Screenshots of active root shells available upon request.

? Can provide uptime, IPs, open ports, and OS details per host (no domain names shared before deal).

? Clean Access:

No alerts triggered so far

No EDR/AV detected

No honeypots (tested)

? Pricing (per server):

?? China: \$250-\$350 each (stable, fast bandwidth, clean IPs)

?? USA: \$250 each (low latency, reliable uptime)

?? Germany: \$210each

?? Singapore: \$150 each

?? Malaysia: \$100 each

? Bulk Deal: Get the full pack (12 servers) for \$1150 flat (save +\$200)

Escrow accepted. No reselling without my consent.

Crypto only (XMR preferred, BTC accepted). Escrow available via forum mod.

? Contact:

[deleted]

Serious buyers only. No kids, no time-wasters.

Can bundle with other services or infrastructure upon request.
