Thread: [Screen lock builder v2.0](#)

OffCode - September 6, 2025, 4:16 pm

Screen Lock Builder

What it does?

Screen Lock Builder lets you generate a portable .exe that locks the user's screen with your own message and rules (e.g., disable Task Manager, block Command Prompt, and optional auto-close at a specific date/time).

This project is really old — I released the first version back in 2015.

Old thread: <https://hackforums.net/showthread.php?tid=4891644>

Starting fresh — this new version is coded in C# (the old one was in VB.NET).

I hope you enjoy it! Please share your feature suggestions and feedback as well.

Download: <https://www.dev-offcode.com/ScreenLockBuilder.html>

How to use

Spoiler ([Click to View](#))

How to use

These files have to be in same folder: ScreenLockBuilderV2.exe and ScreenLockStub.exe
Do not remove ScreenLockStub.exe, if you remove it you cant create new ScreenLock file!

(1) Put ScreenLockBuilderV2.exe and ScreenLockStub.exe in the same folder.

(2) Run ScreenLockBuilderV2.exe.

SetPassword (required)

-Lock screen message (optional;"")

-Executable name (e.g., LockScreen)

(Optional) Toggle features:
Auto-startup (run on system boot)

Disable Task Manager

Block Command Prompt

(Optional) Auto-close:

Tick "Enable auto-close"

Enter a date/time when the lock screen should close automatically.

Click Create. The builder generates your lock executable (named from "Executable name", e.g., LockScreen.exe)

My another project

I'm working on a web-based control panel that can remotely lock the screen and capture a desktop screenshot.

OffCode - September 26, 2025, 7:38 am

Premium version coming soon! Will be much more features!

meskat1982 - September 26, 2025, 9:13 pm

i will try it. thanks.

CL1B - September 27, 2025, 2:16 am

This is an interesting take on ransomware, lockscreen hijacking.

Curious to see what the new features are!

Well its easy to remove, and software is not designed or intended to be used as ransomware. But yeah i know people use wrong these kind programs.

OffCode - October 8, 2025, 6:51 am

Like 1 month and i will release premium!?

Also dev-offcode.com website updated! ?

Stay tuned!

Actually, I've created a web-based encrypted chat. However, it's still a work in progress and I'm not sure if I'll release it. If I do, it will be made available in such a way that the buyer or user could easily set up their own encrypted chat server without any special skills. That has been the main idea of the project – the whole package would be so well-designed that anyone could deploy an encrypted chat, for example, on a VPS or even on their own computer, just like that. :)

OffCode - October 22, 2025, 5:19 am

I'm really excited – Screen Lock Builder Premium should be fully ready for release in just the next few weeks! Check out some of its features in the videos below.

Website lock feature:

https://www.youtube.com/watch?v=FGmIIO_DfKI

Folder lock feature:

<https://www.youtube.com/watch?v=OeFw8-4aOaA>

Stay tuned! ?

Hackers - October 22, 2025, 8:14 am

I thought I replied to this, but it looks good. I'm sure this could be helpful in private/personal privacy software, such as for locking your own computer down remotely, in a deadman's switch setup, or for other whitehat use cases.

Yes, I plan to, once I've gotten my web remote management project / Screen lock builder premium to the point where I can start another new project. I don't yet know what kind of program I'll start making, so if you have any good suggestions, feel free to comment! :)

Thanks! Yeah, that's pretty much the idea — I've been focusing on remote management and control features, but I want to make sure it can also be used securely for personal privacy or whitehat purposes. Still experimenting and adding new functions as I go.

OffCode - June 20, 2026, 10:55 am

Try our premium version! Much more features!

Stanley - August 4, 2026, 9:55 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
