True Announces \$TRUE Token Sale to Build the First AI-Native Perpetuals DEX on Solana

True is a Solana-based AI decentralized trading platform. Proceeds will fund the development of a next-generation trading platform that combines an off-chain high-speed execution engine with an on-chain settlement layer on Solana.

Quote:To clarify the expectations:

TRUE AI and \$TRUE are not meme tokens or meme projects.

Every AI meme project makes the same promises. "AI powered trading" "copy trading"

I'm not calling it a scam token but with as much utility as they are promising, they could market this a different way without a token. They could sell NFTs that give you access or just flat out memberships.

sharn - September 14, 2025, 8:44 am

The \$TRUE token sale is set to raise funds for development.

Investors should be cautious with such speculative ventures.
