How to Read and Write Files from Oracle Forms Using WebUtil

Oracle Forms doesn't natively allow client file access, but WebUtil bridges the gap. This tutorial shows how to configure WebUtil and use it to read and write files, upload and download documents, and enhance application usability. With sample PL/SQL code and best practices, you'll learn to securely integrate modern file handling into your Oracle Forms projects.

Nice little tutorial. I don't use Oracle Forms myself, but I do have a partner that uses it. Not sure if this will be of any help to him, but I've just shared the article with him.
