- Walking with a limp in the street (suggesting a rifle was being held) before the shooting.
- After the shooting, walks through a backway path past a street in stealth mode, it has to be him.

fits the MD, this 99% is the FBI's person of interest.

I think that the limp suggests that the suspect had jumped from a rooftop.

No because he was limping on the way towards the shooting, then ran back the other way after the shooting
