Thread: [buy virtual phone number online using XMR](#)

rjusticemi - September 14, 2025, 12:32 am

Can anyone tell me of an online site that I can use to buy an anonymous/virtual phone number using XMR and receive/send text and make calls using a custom number?

I have used JuicySMS before, and it's good for receiving verification codes for online services, but that can only receive text. Is there a service where I can basically purchase a temporary anonymous phone number that lets me both receive and send text and make phone calls?

Google Voice works well in a lot of circumstances. It's also free.
