Thread: [Marketer/chatter looking for work](#)

Yo!

I'm aware this forum is full of savvy guys, so this thread could help both me and potential employer.

If you're tired of wasting your budget on non-effective ads and marketers not giving a single thought on your project... or a person to attract potential customers via mailing/chatting - I'm your guy!

High-risk and BH projects are my pair of shoes, but BH will also get considered in my mind.

Something about me:

Hard-working guy with around 5 years of BH/GH SEO (FB & Google Ads Campaigns included) experience. My daily tasks also included texting with potential clients, so it's my advantage in this case. I speak German, English and Polish fluently (Norwegian is being learnt in the meanwhile). Hope to get something interesting to work on ?

If you want to squeeze the best from your business/project, contact me via DM here, we'll discuss the details B)

Can you help sell an edtech course made by an indian to developed countries like USA/America/Canada/Australia etc ? Course priced somewhere around \$100-150.

I am pretty sure we could help each other advance. I run a design, dev and marketing agency and we lack marketing expert/consultant so you are welcome to join to our team.
