Little information about Trend Bot

Proud to announce a new tool called TREND-BOT ?

What does it do?

It does up to 8 unique buys & sells per bundle, all same transaction which guarantees minimum loss while increasing token's volume & holders.

All the buys are from UNIQUE KEYPAIRS

No SOL retrieval needed, everything is automatic. It uses fresh keypairs in order to create a fake swap.

Script was built on a customer's idea and it's now up for sale for 20 SOL.

It's probably the best tool I have for Raydium which will almost guarantee you hitting TRENDING in no time.

NOTE:

Raydium-Fast-Volume and Raydium Holders Maker will continue receiving updates & support, but

from now on I'll be recommending this tool over those two.

Keep in mind, this is a separate product, with different logic and codebase.

Attached DEMO video below, create a ticket if you're interested.

FULLY SUPPORTS PumpSwap & Token-2022(Fees/no-fees) & CPMM Raydium & OpenBook Raydium
