Seeking a partner who can send me leads.
It is service based with high paying clients.
I'm responsible for closing deals which is my specialty.
I have a network of which industry I work in.

This can be a one time setup if automated online.

Let me know how you can bring, or plan to bring leads.
What kind of leads?

The kind that's findable on facebook ads.

Damn, I realized I can do this myself, AND ad spend won't be as crazy as Shopify dropshippers spend.

So if anyone can do a fantastic one page website, videos for split testing, we can still partner up! I don't have that kind of time so it would be great if you know how to manage what you're doing. Can advise.
