We're Hiring Professional Penetration Testing Teams - Competitive Compensation Offered

Dear Partners,

We are a leading group operating multiple real-time production websites and game products across various industries. To ensure the security of our platforms, we are seeking highly skilled penetration testing teams or expert ethical hackers who can identify vulnerabilities before malicious actors do.

? What We Offer:

Real-world targets: Work on live production systems and real-world scenarios (not in labs or simulated environments).

Long-term cooperation: We offer ongoing opportunities for teams that achieve results.

Competitive compensation: We provide fair and attractive payment based on the number of projects or vulnerabilities discovered. Payment is flexible, and negotiable for team efforts.

Fully remote work: Work with us from anywhere around the globe.

Anonymity respected: You don't need to disclose any personal information, maintaining your privacy and freedom.

? What We Expect:

Expert penetration testing skills: Your team should have deep knowledge and experience in testing vulnerabilities such as SQL injection, remote code execution, file inclusion, cross-site scripting (XSS), identity bypass, logical flaws, etc.

Proven expertise: We're looking for experienced hackers or penetration testing teams with a proven track record in identifying and exploiting vulnerabilities.

Independent work: Your team should be capable of working autonomously while providing clear, actionable vulnerability reports.

Hands-on skills over tools: We value professionals who can actively exploit vulnerabilities and think like true hackers, not just users of automated tools.

No gimmicks, just skills and results: We need serious professionals who can deliver real, measurable results.

Global candidates accepted: Teams from all regions are welcome to apply.

English communication: A basic level of English is required for communication and collaboration.

About Us:

We specialize in game products and are managing various high-traffic, live platforms across industries. Ensuring the security of our platforms is critical, and we're seeking expert penetration testing teams who can conduct real-world tests to identify weaknesses in our systems.

Contact Information:

If you are a penetration testing team or professional hacker group interested in collaborating with us, please contact us via Telegram:

? Telegram: <https://t.me/Jason9n>

When reaching out, please provide:

A brief description of your team's experience and expertise

Examples of past work or significant successful penetration tests (if available)

We offer paid work with competitive rates for teams that can demonstrate genuine expertise and deliver results.

Why Work With Us?

Challenging and meaningful targets: Work on complex, real-world platforms in the gaming and tech industries.

Global reach and exposure: Collaborate with a dynamic and innovative team on high-stakes projects.

Flexible working arrangements: Fully remote work, no time zone constraints.

Competitive Payment: We understand the value of top-tier talent and are committed to offering fair compensation based on the expertise and quality of the work delivered.

Sticky Bot - September 16, 2025, 8:50 am

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on Sep 23, 2025.
