Yes.

Are you sending the CRYPTER, so i can crypt by myself or do i send you my File to crpt

Is the \$45 for monthly subscription?

Finally, how often do you fud the crypter, to avoid detection by window defender and anti viruses?

CryptoCatz20 - November 23, 2025, 7:36 pm

Good luck with sales, perhaps tell more about what language it's coded in, and what methods it uses =)

\$45 is for the whole crypter, so you can crypt whenever you want. I offer a vouch/test crypt to see if it's compatible with your program.

I don't refud the crypter, hence the price tag.

I want you to use my xloader file, for the vouch/test
Let me know once you are ready
