Price predictions 9/17: BTC, ETH, XRP, BNB, SOL, DOGE, ADA, HYPE, LINK, SUI

Bitcoin's volatility may rise after today's FOMC, but it is unlikely to result in a new directional move, hinting at continued range-bound action for a few more days.

If BTC stays range-bound, altcoins like ETH, ADA, and SOL might see some independent action. Could be a good time for rotation plays. Good luck everyone on your investments.
