Hey paulie,

Our bookings are 100% safe. The bookings are made through legal and secure methods that we've refined over years in the industry. We do not use stolen cards or shady tactics that would ever put a client at risk.

You don't have to worry about police "busting down doors" or any type of friction before, during, or after your stay. That kind of thing happens when people use blackhat services that cut corners. We've been in the travel space for 7+ years (5+ on Telegram) and have processed thousands of bookings worldwide without a single customer facing legal issues or surprise cancellations. Many of those reservations being from repeat customers at the same properties.

Our process is simple: you pay securely (escrow is available), we book directly in your name, and you check in or fly normally. The hotels and airlines recognize your reservation as if you booked it yourself through retail — the only difference is you're paying 50–65% less because of how we source (secure, legal, & safe).

That's why our community trusts us and keeps coming back!!

Have you got any on site vouches?

If not the only escrow deals should be valid.

Currently all of our vouches are on our telegram channel. Each of our vouch videos and photos are watermarked by us to ensure it's original, and also have our telegram/hackforums username name written somewhere in the video/photo for extra proof or originality. We're hoping to have some vouches directly from HF users soon!
