Vitalik Buterin finally pushes back after weeks of staking queue FUD

Ethereum co-founder Vitalik Buterin defended his blockchain's 45-day exit queue after Galaxy Digital's head of digital called it "troubling," sparking backlash.

I can see why a 45 day exit is frustrating, while also acknowledging that there must be an exit delay.

Not sure if 45 is acceptable to me, but perhaps 30 is.

I realized I could actually work on the Stanley award.

Don't blame me! You could contribute to the forum you know, not just be a bitch that answers to losers. Have your own voice mate, I ain't the problem on this forum.

It's funny how you invited me to Infamous and told me to help make Crypto Currency more active and one of your little groupies whispers in your ear and now you're talking like this.

Two-faced and spineless imo!

I invited people who appeared to be positively contributing towards discussion in this section. Last week it seemed like you were attempting to do this.

You were removed because others within the group warned that you're trouble.

Luckily, these other members within the group were accurate in their warnings.

Regardless of how right my fellow members are, I would have swiftly removed you this week as you devolved into being a low budget GPT spammer.

I don't think your opinion is valid because you think that on-topic discussions are "spam".

I think you are just upset that Infamous has no presence on the forum other than you bitching about people being active on the forum.

Get a life.
stay on topic!

What do you think of Vitalik's comments?

Spamming nothingburger posts on stanley topics that haven't been touched in a month is the very definition of spam. Just because you try to make it sound relevant doesn't change the underlying impact of your shitposts.

You are literally spamming right now man...

Off topic posts to harass others is not HQ. It's spam. Bringing up topics that are still highly relevant is not grave-digging, and bringing up a post from a month or less ago is 100% appropriate when the topic is still relevant.

You are the spammer you so much despise.
Stay on topic!

what do you think of Vitalik's comments? I already shared mine

You and I both know who they'll point their finger at.

Your posts are dogshit and your strange logic to justify your bullshit is mental retardation.

I literally do not care though man. You've now posted numerous times in this thread with nothing of value, all because I shared my thoughts, on-topic.

I don't know how to get through to people like you, you are delusional.

I'm disliked and called a spammer for what? Typing fast & staying on topic?
Meanwhile what are you, the chief of anti-spam who derails threads?

I literally don't care about peons like you. of course you won't like me, I don't show respect to those who do not earn it and don't give your namesake, group name, or anything any sort of modern day value like you may expect.

Sorry!
stay on topic!

That's a lot to write in 45 seconds. Didn't realize, and I know that I should have because you don't even try to hide it, that I'm talking to an AI chatbot.

Lowest quality member on this forum is Enki. You have surpassed the others shitbags rather quickly.

I write at 100-130 WPM, again, you are criticizing me for being good at things.
I think my record is like 135, but it's so dependent on the testing tool, word difficulty, and time interval.

Go on, continue to derail threads, I'm sure Omni appreciates it when people derail threads.

You are the problem in crypto currency right now, not me bud.

Stay on topic!

Do you have any value to add to crypto currency, or are you just going to keep bitching because you know you are past-time?
