Thread: [\[Make \\$ 200 daily \] Full Ai Agent Automation No Courses - No Ads](#)

Mr.ProVanzla - September 18, 2025, 7:59 pm

First of all Everyone can do this!

Now let's get to work.

How I Made Close to \$33,000 in One Month Using AI Agent that auto Generated YouTube Videos & Affiliate Links AND
Can You Really Make Money Like This?

First In the beginning, you won't earn as much as I do, it will be \$200 a day, but over time you will catch up to me.

Yes. You can easily make \$100/day, \$10,000/week, or even \$100k /month. This depends on you and if you do everything as I recommended

How? By leveraging AI to generate traffic with mass video uploads, redirecting that traffic to affiliate links, and doing all of it with automation.

Let's first solve something, in order to sell something, we need to have someone to buy it, and that is the only way to earn money, and what if there is a way to reach millions of people and practically do nothing?

But we don't want to spend a lot of time creating ai shorts youtube content, we need to come up with a topic, create ai videos, edit, upload, etc. even if we have several channels, that's too much for us, what we want is an ai agent that does all this completely for us!

We all know the truth:

No people = No traffic
No traffic = No sales
No sales = No customers.

It's simple math.

If you want to make money online, you need traffic. Traffic is people. People = buyers. Buyers = money.

So, What and how i make it happen?

In July, I was watching these AI-generated YouTube Shorts you know the ones, weird videos that make you go, "What the heck did I just watch?"

I was curious because these videos were getting millions of views. One video just an AI-generated screaming ear of corn reached over 800 million views. That's when it clicked:

If a screaming ear of corn can get 800 million views, imagine what could happen if we put that kind of traffic to better use.

Here is another example now imagine this as potential buyers 500 milion views = \$\$\$

I realized I didn't need to make these weird videos for YouTube AdSense. I needed to redirect that traffic to affiliate links the real money.

The Real Answer to Making Money with Free Traffic

Here's the formula:

AiAgent =

AI-generated videos = Traffic

Affiliate links = Sales

Automation = Scalable profit \$\$\$

And here's the best part:

I didn't have to create these videos myself. I didn't need to edit them. No face cams. No speaking. Just automation.

So let's move to the part where we will make all it works!

Step 1: Automate Everything with the Right Tool

The key to my success was automation. No manual work. No content creation. Everything ran on autopilot.

I found a tool that works perfect with this. This tool costs less than \$15 for a lifetime license. It's an absolute game-changer.

So first get the tool [AiAgent](#)

What Does the Tool Do?

Text-to-video generation: Converts text into engaging video content automatically.

Content pulling: Pulls content from platforms like TikTok and Instagram to generate videos.

Subtitles & AI voiceover: Automatically adds subtitles and AI-generated narration to the videos.

SEO optimization: Automatically generates video titles, descriptions, and tags based on keyword

analysis.

Auto-uploading: Schedules uploads across multiple YouTube channels, non-stop, every day. This is your AI agent that works 24/7 creating and uploading content, driving traffic, and even optimizing for the algorithm without you lifting a finger.

Step 2: Set Up Multiple YouTube Channels

The next step was to set up several YouTube channels to maximize the reach and exposure. I didn't just rely on one channel—I created multiple channels, all with different niches.

How Many Videos to Upload?

10–20 videos per day across all channels (3–5 videos per channel daily).

Why? Too many uploads on one channel can get you shadowbanned, so don't go over 3–5 videos per channel daily.

Step 3: Choose Your Affiliate Products

The magic happens when you start monetizing your videos through affiliate links. I signed up for affiliate programs in multiple niches, including:

VPN services: With privacy concerns at an all-time high, VPNs are a hot commodity right now.

Creative Fabrica: Great for pet-related videos or custom merch.

Amazon Affiliate Program: Literally millions of products to promote (tech, phones, gadgets, home items, etc.).

Creative Examples of Affiliate Products I Promoted:

AI videos generated with agent = bird rescues a lost dog from the forest, a short story, what am I selling?

I promoted pet backyards houses, GPS collars for dogs, and pet toys. makes sense?

AI story videos: I promoted backyard birdhouses and GPS tracking collars.

Winter tire ads: Yes, a hedgehog saving a dog from traffic promoted snow tires!

Here's the key: Anything works. Just make sure the product is relevant to the content, and people will click and buy.

Step 4: Scaling the AI System

The real secret to success is scaling. The more videos you upload, the more traffic you get, and the

more money you make.

How to Scale with AI?

Set up your channels.

Upload videos daily.

Let the AI auto-generate titles, descriptions, and tags.

Let the AI automatically upload to YouTube.

Let the AI collect traffic and redirect it to your affiliate links.

Repeat.

As your channels grow, you'll see millions of views without needing to rely on the YouTube algorithm for every video.

Step 5: Let the AI Drive Traffic and Generate Sales

Here's where the magic happens: The more content you upload, the more traffic you get. This traffic isn't just any traffic it's targeted traffic that's directed to affiliate products.

The Profit Breakdown:

Let's say one of your videos goes viral and gets 1 million views:

1% conversion = 10,000 buyers

Selling a \$1 product = \$10,000

Selling a VPN service with a \$16 commission = \$160,000

You can be generating 10,000+ clicks on your affiliate links per video, even with just 100,000 views per video. This is scalable, and it adds up fast.

Key Takeaways:

AI Automation = Unlimited, free traffic.

Affiliate Marketing = Turn that traffic into money.

Scaling = Uploading content continuously, on autopilot, without lifting a finger.

No Ads, No Courses, No BS = Just automated traffic and smart affiliate links.

Final Thoughts

This method works. In fact, I made \$33k in just one month using AI automation to create and upload videos, drive traffic, and sell affiliate products. You don't need to be an expert, you don't need a huge following, and you don't need any fancy software. Just AI, automation, and affiliate marketing.

Now, it's your turn. Get started today and let the AI do the heavy lifting.

If you have any questions or need further help, leave a comment below. I hope this tutorial helps you make serious money with AI automation!

Does AI work only with YT or can be used on other ones ?

Also is there kind of risk for YT accounts if they detect automation process kind of robot system ?
