Thread: [Pistol Gaming Mouse with Recoil](#)

Capo Star - September 18, 2025, 10:20 pm

Omg this has me going nuts over it. I love it soooo much.

That's just way to cool. I've been in talks with them for a while, and are able to get sponsored by them. I am able to get you the mouse cheaper than they have it on the website. Let me know if you're interested. If not, let me know what you think of this baby

That's the most gimmicky, cringeworthy shit I've ever seen. Not only will the latency be utter shit, but this product will definitely make you bad at whatever game you choose to play.

I don't think it'll affect the latency since it's still using mechanical switches. Also it's nothing new, it's just a vertical mouse with a gun mold and vibration. But yea, gimmicky and definitely cringeworthy. ?

Don't get me wrong, it's pretty cool in some aspects, but it's also very gimmicky and niche. Not to say that's necessarily a bad thing of course given they surely know the market for this kind of thing and I'm sure a certain audience exists that loves peripherals like this. All the power to them. I personally don't see it as something that would be too popular, but maybe I'm way off. In any case, thanks for sharing and enjoy!
