I can highly vouch for Vectura.

He has worked for Sellup for several weeks.

Has re-designed the entire <https://sellup.io> dashboard, store layouts and landing page.

Has also done various features which required backend development, has also done refactoring of my entire sellup source (js).

I've recommended Vectura to make this thread here, as i currently don't need more work done on Sellup for now and i'm confident that other HF members would be wise enough to do business with him.

Nice web page, I love the colors/vibe it gives off. Really smooth and easy to understand as well.

Keep up the good work man!

? Spots Just Opened Up!

I just wrapped up a couple of projects, which means... new spots are officially open! ?

If you've been waiting to grab a place, now's the time — they tend to fill up really fast.

Don't wait too long — first come, first served!

Shoot me a message if you're interested. Let's make it happen!

Good luck with sales mate, I liked the Promo trailer - looks good, same as the thread design.
