Thread: [Looking for good opsec tips. and how to stay safe on the internet](#)

fixthejinx - September 21, 2025, 10:04 am

Hey everyone, I really need some information on OSINT and other stuff, recently i have got a job to pentest a site that had a sql vulnerability. i got in but it was a scam. i got hacked because some ports were open and they used reverse shell. so i dont wanna do the same mistake anymore, i need all tips. i wanna stay as a ghost. i use windows but am switching over to linux soon. and am changing my BIOS chip on my laptop to a custom one (going to be hard but its alright.)

I use Proton VPN

Tor browser sometimes

Yeah thats all really. please give me all tips and tricks and information.

Thanks

FixTheJinx

The reason why i made an account was to read this guide :

<https://hackforums.net/showthread.php?tid=6293223&highlight=opsec+guide>

It was truly awesome, would def recommend it for the basics

I love to hear that ! i am glad you learned something and now your apart of the forum

Stay safe

I just posted a new OPSEC guide on linguistics and online digital footprints
