You stay away from large sellers like chicks. try to find people that farm gp, stay away from resellers. dont trade on a low level fresh account.

And yeah, this thread is just for when I be making sales on GP, which isn't all the time. This way I won't have a million threads all for the same stuff. ??

I'll be doing \$0.18/M but I suppose the price could change as the market fluctuates. So, I added the current price, but I'll be changing it as I need to.

Adding to the preventing RWT issue, ensure you are trading "some" items for their gold.

Example if they are putting up 50m, you should be offering something in exchange.. example buy a bond trade it to them for the \$\$\$ and then have them redeem the bond on you.

This doesn't trigger such a deep dive into your trading as RWT.

So example... 1 bond is 13.5m, if I buy 50m. I trade a BOND to them for the 50m and then they redeem the bond on me. Unequal trades or trades for nothing trigger a flag for manual review.

Ahh yess. Very good input. I suppose if I was to dive into both buying and selling, then perhap's I might take a look at that on a serious note. :)

It's always protected me from RWT bans, giving something for something else, even if uneven doesn't seem suspicious because sometimes your friends will give you \$\$ to help you along the way.

What the "seller" or your "friend" decides to do with the bond occurs outside the trade screen.

Obviously they can deep dive the "seller/buyers" account for actions prior to and post the trade, however that's more in depth and usually they do a cursory look, usually directly at the trades.

It's not nice to talk sales, or hijack threads sir.

I think I am gonna just close this thread. There seems to be enough activity for this game and the currency for when I make my threads that I need to make when I sell. Which there's way more activity then I'm able to sell. So...
