Thread: [DEV SERVICES / BOTS / WEB DEV / APIS / TOOLS / C# / HTML / TAILWIND](#)

OneManArmy19 - September 21, 2025, 11:26 pm

Hello,

I'm a full-stack developer specializing in creating scalable web applications, bots, and tools. I create powerful back-end systems and beautiful user interfaces/panels.

My Technical Stack:

Back-End: C#, .NET, ASP.NET Core, API Development

Front-End: Modern JavaScript (ES6+), HTML5, TailwindCSS

Other: Experience building bots, tools, APIs, etc.

Highlighted Projects:

Ascendbot.net: Developed a Windows application that automates Twitch ad-viewing, helping streamers effortlessly increase their ad revenue through a optimized and reliable system.

StreamHax.com: Built from the ground up—including payment processing and dashboard UI—a web-based service platform for content creators on Kick and Twitch.

Payment: Crypto only

I am available for new projects, from MVPs and SaaS tools to custom web applications. I'm committed to writing clean, maintainable code and delivering on time.

Let's connect to discuss your project needs. You can reach me via DM or telegram @theresilientx.
