Fellas, I've just encountered an awesome free Airdrop opportunity that seem like a high potential, it's free, only requires a click every 12 hours and patience till release.

Let me introduce you #Knovus
@Knovusofficial on X
<https://x.com/Knovusofficial>

Hightlights:

1. Minimum 750 points for simple tasks daily, 200 for just 12h daily claim button.
2. Some tasks adds up 10 points daily automatically just for following their X & Telegram (10 daily points for each everyday right after the first time you complete these tasks only one time.)
Meaning, Passive farming!
3. Their protocol & network development is phenomenal, truly a no-brainer for participation, DYOR.
4. You don't even connect your wallet yet, since you register to that farm only through email for now, so imagine how early we are.

By the way, you can earn 250 Points bonus by just joining through my link down below:

MARK: The referral system there is totally optional, you may farm & collect points till the airdrop individually, meaning you are not depended on anything beside your constancy of doing your daily claim button and the other free tasks you may also complete by yourself. In other words, a nice way to earn money / crypto for the least effort, and if you wish to earn more then you may do further tasks, its your choice, either way you win and you earn.

Happy farming & Have an awesome Bull-run. See you onboard!

PS: I advice you to keep following their X & News because they constantly post promo codes of free points since its their beginning and they truly started big + this upcoming bullrun so imagine what could happnen with a decent airdrop of a project that Insta list to all major exchanges. - Food for thought.

Cheers folks, hope it will serve you as it will serve me, and WAGMI!

I do not understand how this works exactly. Will it eventually let me trade points for crypto? Or what exactly happens and how do I receive crypto from this?

Works quite simple buddy. And i apologize if my thread was too long for a read, but right now its the farming phase, meaning that the wallet link & airdrop timeline is soon about to happen, so everyone may farm the airdrop for free before they unleash it.
