Thread: [installs & FUD crypt or priv crypt service & CS2 Skins](#)

codeine. - September 23, 2025, 12:42 am

hey guys looking for installs & FUD Crypt pref a priv service i can continously use im sick of all these ripoffs over here on hf killing the service in a month once you get lifetime lmfaoo that isnt even fud aside from that completely diff subject im a large cs2 skin collector and am looking for coverts in ST FN or FN only pref, knives, gloves, or any pink/purp have to be only FN/STFN . ill do st mw low float aswell but only on rare items.

lowest float im looking for on the other side is FT-FN for gloves (good knuckles only w good float) knives FN only pref phase 2 doppler max pink t1 or galaxy or black pearl, will take a look at other ones tho just no BFK karam stiletto. i like chonkers like m9 & normal bayonet, bowie, skele, kukri, huntsman, nomad, survival or classic knives, maybe shadow dags if its phase lmk have like 10-20k to blow on skins

[contract=tid]Start Contract[/contract]

For a proper vetted crypting service don't look further than Crypting Engine 1 or 2.

For "installs" I'd advice you to build your own botnet overtime. Why? Because when you buy "installs" you're buying targets that many have bought and accessed before you.. You can waste money on "botkillers" but like I wrote; It's a waste.

Not to mention that "install services" most of the time provide very poorly specced targets and proper crypting services like Crypting Engine wouldn't even decrypt on those due to environmental checks (Less than 4 or 8gb ram)

Use a proper c2/loader when building your own net -> Sideload payloads to spread for max. success rate or do mass loadings via c2/loader.

+1 for malbo!!!! if you got to take a risk and get fuck again malbo wont let your dont and more importsnt WONT FUCK YOU UP im sure of it enough to offer you cashback your lost if shit happen

man!! This man is the man, i thrust only 2 cryoter in here and he is one of them :D and his crypting service if VEEEEERY decent i had low expectation when i bought but it will be a no think if i ever need crupting ever again!!!! KEEP UP VROTHETR MALBO you are a chief :)

Money- - September 23, 2025, 9:37 am

I can buy cs skins from my steam balance if you want. I am doing 85% rate outside. What rate you want?

it says there are 0 avail on the website?

so you'd recommend the best one is red c2 or the crypting engine?

let me know very interested
