On August 2nd I bought 20 x 3 month boosts for my Discord Server

As I sent the payment, vyactor disappeared for about a full day, missing my messages, until the boosts were done. A bit weird but I shrugged it off, people can get busy

Fast forward, 6 boosts expired on September 9th, which were refilled after a few days of messaging him, shortly before 8 more boosts expired as well. Today marks 10 days since those 8 boosts expired. I kept messaging him, reminding, was assured he'll get them fixed today, tomorrow, in a couple days - they still aren't fixed. Meanwhile, I paid for ads using the server's custom invite url which is inactive since the expired boosts, so not only I'm not getting what I paid for, I'm also losing extra money by the day

Meanwhile, he's been checking into the forum every day, while ignoring my discord messages I either want the boost refill and compensation for the wait, or a full refund so I can go to a different supplier.

Discord nitro tokens have really been volatile after they removed nitro promotions. I've tried refilling to every bit of customers right when I had the time. Was busy completely for past weeks, I've dmed you on discord to resolve this. Thank you.
