Thread: [\[FULL CODE AND GUIDE\] Rootkit for your Botnets/RATs](#)

WraithTools - September 25, 2025, 10:01 pm

I have written a guide and shared my rootkit.

Sorry I have to charge bytes for it...

You can get it here for free.

In case pastes.io goes down, or in case the code is edited in the future, here's the backup

I read through it and it looks clean, but should obviously be run on a dev VM for 100% safety w/ system configs, reg keys, etc.

Looks good OP!

Thank you, very much appreciated! YES I reiterate, only use in VM or dev environment! This will be a bitch to remove!
