5 Steps to Launching a Lovable Vibecoding Project (and Why Skipping Step 3 Will Cost

After 8 years of building everything from appointment booking solutions to AI-powered applications, I find vibecoding to be extremely interesting. Here are the 5 crucial steps I used to launch my latest Lovable project, and why most people skip step 3.

Bumping this thread because Lovable is coming up in a lot of security scans & people are messing things up. Step 3 here in this thread is to run your starting prompt 3x in new lovable projects & pick the best one. I will add onto this and say, check the auto security scan feature for each Lovable project too
