Thread: [Hover Over Profile Information](#)

Mooooookie - September 27, 2025, 9:38 am

Suggestion:

I don't know how easy, or difficult this would be to add.. but it would be convenient if you could add "Last Time Seen" to the information that is displayed when you hover over a users Profile Photo. When you're in a thread, when you hover over a users Profile Photo it currently displays "Joined September 2025" .. if it could display "Joined September 2025: Last Login - 7 hours ago" ..would save time from having to click on a users profile to find out this data.

I wrote something like that once, PM if you're interested.

You can pin multiple and they'll stay pinned while you're browsing the forum.

BlackMale - September 27, 2025, 2:20 pm

Would be very useful hope this is added.

Very clean coding. Not sure how useful the pin feature is but this looks beautiful

[CL1B](#) excellent work buddy

@mooooookie@good suggestion , i think i saw something suggested like this here before

Omniscient - September 29, 2025, 9:44 am

I've contemplated a universal Profile Card that could be used all over the site. For now the userscript by Marlboroman should suffice.

Sort of like what [Mooooookie](#) created.

It would be nice if it was a popup from certain links on certain pages.

I think you were referring to what [CL1B](#) created.. which actually looks great. That would be nice if you did add something like that to the site, I feel like it's a feature that will help modernize the forum even more.. and will also be a time saver, so that users don't have to visit other users profile for just basic information. Would love to see this added to the to-do list in the future.

Maybe there's a way to do a more generalized link preview for all links and then hook up user profiles with new meta so it pulls in certain stats for the preview. That way you don't develop anything specific to this feature, and still have all the positives of inline meta previews...

I would love to see a way to hover over any link for a preview, or even to have full previews embedded in posts too.
