Thread: [Sincere Apology](#)

MutatedArm0964 - September 29, 2025, 11:08 pm

Many times I forget to keep my thoughts to my self and I end up annoying or pissing people off. 13 hours in on the forum and i managed to do just that. I made a thread that was not thought out and impulsively posted it. I sincerely apologize for being an idiot and for being, citing from one of the two users I annoyed, "A useless semicolon in Python". I dont know if deleting a thread is possible on my end so I'm editing my post so that I do not further annoy or piss off any more senior members of this forum. Again, I sincerely apologize. I accept the bad popularity given because it was deserved.

Not just here, but most forums have people that you've mentioned and trolls like yourself.

I think kicking you out would ensure removal of one useless troll.

BTW, welcome to the forum.

It is plain to see that a trollish heart is pounding in your chest cavity...

The community forgives you. May you find happiness on your adventures. Now, walk in peace, son. Amen.
