Anyone have that one animal that they've thought was cool and have never seen in person but want to?

I've always wanted to see a wild Scarlet Macaw

Do dinosaurs count? I mean in reality I would not know any animal that is currently alive that I have not seen yet.

I'd say they count. I know where to find a dead one - alive one, whole other set of issues

I've seen a dead one so it's def an alive one I'm after.

Any crazy HF member that is looking to spend some cash and recreate Jurassic park for me?

I'd say we should get a group of us to recreate it. With all of us together, we're unstoppable.

Just need some cloning, should be relatively easy, you think?

With the help of AI it should not be a real problem I think!

I feel like the AI could just make the dinosaur on its own without any need of assistance. Put the AI in a room and tell it to do its thing

Everyone is fearing AI will take over the world & kill us all when in reality it will be AI who creates

the Dinosaur that will wipe us out! xD
Haha.

Dinosaurs.

They ruled the Earth once. I would love to see one alive.

Orangutans. They are so chill and funny looking.

I watch the live stream of them at a zoo every once and while.
