Whats your fav old gaming console, from 80s,90s or early 2000s?

I am talking Game Boy, Atari, Neo Geo, Game boy advance or NES or a completely different one!

For me it would be SNES - Super Nintendo entertainment system

I have installed EVERY game for this beauty on my raspberry pi to play, just awesome memories good games, solid quality for its time just perfect :)

Now its your turn! What is your favourite old gaming console?

Man I still love my PS1 with Tony Hawk Pro skater 2

One of the best oldskool games imo.

Very good choices! I have played all of them and fell in love with the N64 on the first game :) What is your favourite game for it?

Donkey Kong 64, Snowboard Kids 1 & 2, Pokemon Stadium, Super Smash Bros, and Kirby Crystal Shards. I know I'm missing a few more

I miss my clear purple gameboy

Snowwy - October 3, 2025, 9:30 am

PS1 for me for sure.

THE only old school console I played was the Dreamcast, or the gamecube but gamecube was peak when I was in elementary school

I enjoy SNES for nostalgia and gameplay.

Every game has charm and polish.

I bought a PS3 again recently just to play some games that are still stuck on that console.

SNES was one of my favorites. Used to go to a friends house and play Super Mario all day.

But my top is the Gameboy Color. I'm surprised my family wasn't in debt by the amount of batteries I needed.

N64 easily. Pokémon stadium is my favorite game of all time.

DemonAsylum - October 31, 2025, 11:49 pm

It would definitely be the N64 for me. While I played other systems before it, that was the first one to truly get me hooked. I was introduced to so many amazing games and of all different kinds on there and that played a big influence in what I went on to later enjoy.

Damn, it would be every version of game boy, from black and white, to color, to advance and finally SP, whoa, what a feeling, felt like the coolest kid back then, had a Sega mega drive too. Good old days
