**P??sonl?af** - October 3, 2025, 4:44 am

Hey hey!

Let's say Aliens land tomorrow. Justin Bieber, Zuckerberg & Trump not included xD

What would you show them first if you are the person that would greet them?

**plops** - October 3, 2025, 5:02 am

Probably India. Let them take in the sights and smells. The local culture.

Theyd leave and never come back

So small that they have to come all the way from space to actually see it. Alright. Got it!

Built to touch the clouds.

I don't know any good places or something to show them , may be i will show them the way out of my town

**Charlie Sheen** - October 5, 2025, 11:44 pm

Dude. I would be in a cave. I'm not meeting aliens. Historically, in movies it doesn't go well.

**Yanix** - October 5, 2025, 11:51 pm

I'd take them straight to a traffic jam. If they survive that, they're ready to understand humanity. Nothing scarier than rush hour!

**2xTheTap115** - October 6, 2025, 1:14 am

I think I would show them a video, some kind of internet iceberg on YouTube. That would tell them a lot about us ???

**Oh\_Well** - October 6, 2025, 4:16 am

I would show them our UFO conspiracies to get their reactions - imagine laughing their ass off hahah

**aj33b9009** - October 8, 2025, 12:28 pm

I will show them a Star Wars movie.???

**RangoWorld** - October 9, 2025, 1:14 am

I would show them a plant. Assuming they haven't seen it before.

**Hackers** - October 9, 2025, 8:31 am

I would show them the problems and start a conversation about short-term vs long-term options for

humanity on the planet, to balance innovation with sustainability, and purpose with calmness, and desires with necessity.

Then again, if they do arrive, they'll do so because the problems and solutions are known or expected.

Perhaps I would ask them to show me instead.

I would 100% go all-in, as-in it would be better to willingly walk into a craft for the chance of adventure than to run in fear.

Whatever happens happens.

That said, I am not saying that I believe aliens are here or coming soon. I won't rule that out, but I just want to make that clear. I think a lot of people think I am an alien nut.

I do not have an explanation for what we've seen, but nothing was physically impossible - just outside current, public capabilities.

Although unlikely, if you said a Dolphin flies around in an orb, that would be more plausible than assuming aliens have arrived. On the flip side, a breakaway civilization is more likely than a dolphin flying around. And humans making a craft and hiding the energy breakthrough is the most likely scenario.

I'll await answers, but we do not have them yet.

So if aliens come, I will not show them much. I would listen, observe, and respect their expertise and experiences.
