Hello everyone

So do you have a gambling soul ?

Lets say ,You have two options . the first one gives you a 50/50 shot at \$100 million, while the second one guarantees you \$1 million.

Which one would you choose and why?

Personally, I would choose the guaranteed 1 million , a bird in the hand law

I know the safe choice is \$1 million, but gambling sounds fun. Who knows, maybe I was the God of Gamblers before this life. Only one way to find out. :D

In this case, I would also play it safe, that million would solve many of my problems.

If I need money, I won't take risks, but if I don't need it, I'll take even bigger risks.

100% love the idea of gambling but when it's stuff like that I'm hesitant. It would depend on my situation. Like currently, I would take the \$1m. Butttt, if \$1m doesn't solve my problem, then I'm taking that 50/50

I get why people like it but I have never been a fan of it. I have gambled once on a cruise and came out on top. Still did not enjoy the risk of losing money.

I'd rather lose it by spending it at mcdonalds or something.

To answer your question, I'd take the solid 1 milion

I am 110% taking the chance at 100 million.

1 million would certainly be nice, but it's really not a life changing amount of money anymore.

Ithink we can gamble but lower amount, when in big we hesitate a little

I do love gambling but i would take the guranteed \$1m

simply because i really dont care of having millions upon millions. I could live the rest of my life on that \$1m and buy a modest house and a new car and be satisfied. I dont need nothing fancy theres no point especially as you get older you realize that.... also i wouldnt have any ambition left if i just got \$100m right away

I'm not a degan, but I do at times find myself fighting the urge to gamble. I've had good luck and bad luck.

angstyjay - *October 5, 2025, 11:29 pm*

50/50 obviously

i'm overdue for a win
