Elon Musk's answer to 'falsehoods' —Grokipedia will be out in 2 weeks

Elon Musk announced that the first beta for Grokipedia, xAI's answer to platforms such as Wikipedia, will launch in two weeks.

Considering how contaminated X is with fake news and verifiably false information, it'll be interesting to see how this goes.

I can't imagine any reputable scientists, researchers, or others will rely on it, but I'm sure it'll be a hit for social media.

Wikipedia is not perfect, but I think X is a great example of what censorship looks like in practice.

X... Truth Social... the pioneers of no-censorship fact finding?

I look forward to this just to check it out. I don't think it will be something that replaces wiki. I kinda think it could be a waste of time.

This guy..

Beef with wiki? Who else could do that.

But, as far as good with musks moves so , if it delivers unbiased infom, could be the next new thing

Interesting—Elon trying to fix misinformation with Grokipedia. Could be useful if it stays honest and not biased??

I'm very excited to see how the launch goes!

Interesting move from Musk and xAI. If Grokipedia really aims to rival Wikipedia, the big question is how it'll handle accuracy and moderation—especially since Grok is known for its edgy tone. Two weeks isn't long, so it'll be fascinating to see if it's truly community-driven or more tightly curated by xAI.

I've always preferred using Grok for certain things especially when the topics are "touchy" or too woke, will definitely take a look at this

If Grokipedia delivers on accuracy and neutrality, it could be a real Wikipedia competitor.

After seeing how poor Grok performs on X, I have low hopes, but I could see something similar in the future.

We're almost there, I am very excited to see how Grok handles falsehoods and truth

Anything we can do to improve accuracy, to ensure that facts are relayed regardless of emotions... That will be helpful.
